Knight Foundation School of Computing & Information Sciences
Master's of Science in Data Science & Artificial Intelligence

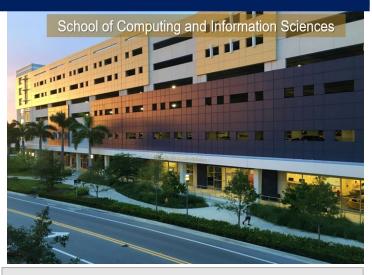

School of Computing and Information Sciences

FIU's Knight Foundation School of Computing & Information Sciences provides a wide range of opportunities to its students, offering a range of graduate level degree program, in a number of disciplines.

The MS in Data Science & Artificial Intelligence is an interdisciplinary degree program designed to provide studies in scientific methods, processes and system to extract knowledge or insights from data in various forms. With 5 areas of concentration available, students can pursue a more specialized study in the field, obtaining a higher level of education.

Our program prepares you for the fastest growing, highest demanded job prospect in recent history. Take a step into the world of data-driven models and multidimensional datasets. Find answers in the areas of bioinformatics, financial computing, computer forensics, big data algorithms and much more.

The time is now! For more information about this opportunity please reach out to the graduate program advisor TODAY!
